

There are serious electrical safety risks inside ceiling spaces and roof voids.

Amalgamated Pest Control is dedicated to the safety of our employees and customers.

For this reason, our technicians cannot enter your roof void or crawl space until this electrical hazard has been removed.

BEFORE WE ENTER, PLEASE...

TURN OFF THE POWER AT THE MAINS SWITCH WHEN WE REQUEST IT

MAKE SURE IT STAYS OFF UNTIL WE ADVISE YOU OTHERWISE

TURN THE POWER BACK ON ONLY AFTER WE ADVISE YOU TO DO SO

When you turn the power back on, please check your clocks and that your appliances, such as fridges and freezers, turn back on successfully*

** APC accepts no responsibility for any electrical item/s that fail to re-start*

THANKYOU FOR YOUR CO-OPERATION
